PRESSURE VEST

This durable vest features 2mm neoprene similar to the fabric used for wet suits. It's perforated allowing it to breathe preventing your clients from over heating. It features an easy to adjust two piece design with hook and loop closures at the shoulders and both sides of the vest. Some therapists prefer this design to a traditional weighted vest because you can adjust the amount of pressure simply by adjusting the vest rather than adding or subtracting weights which can become expensive or bulky depending on the client.

Choice of **BLACK** or **RED**.
